

Assign the same color bar settings to multiple images

Select multiple images

- 1, Select the images that you want to set the same color bar for
- 2, Click the sun icon

Histograms for the selected data are displayed under “Color Bar Adjustment”

Histograms are displayed for the selected data. The signal strength settings of the color scale are recalculated together with the color bar.
Press “OK” and the selected images will be shown with identical color bar settings.
If necessary, adjust the parameter values on this screen.

The selected images are shown with the new color bar settings
