

The Cold Cathode Fluorescent Lamp (CCFL) of the LCD monitor contains mercury.

If the CCFL collapses accidentally, leave the area immediately while minimizing breathing to avoid inhalation of the vaporized mercury gas. Ventilate the room immediately.

If the gas in the CCFL is accidentally-inhaled, consult a doctor immediately.

Disposal consideration

It must be disposed in compliance with the respective national or local government regulations.

Consult your local Government Agencies or your local distributor for a proper disposal method.
