

FLEXAVISION series Exceeded 5,000 units Worldwide Sales

The number of order booking of **FLEXAVISION series, Shimadzu's flexible R/F solution with Image Intensifier (I.I.) / dynamic Flat Panel Detector (FPD)**, has exceeded 5,000 units worldwide as of March 2022. Since the first system release in 2007, this series continues to evolve with the concept of "Flexibility" to meet customer needs. This year, FLEXAVISION F4 package was launched, the hybrid DR system equipped with a 17" × 17" FPD capable of fluoroscopy and wireless radiography. As a pioneer of the Remote-controlled R/F system, we will continue our efforts to contribute to healthcare workers and patients around the world by our advanced technology and premium quality products.

Milestones of FLEXAVISION series

- in 2007 FLEXAVISION SF/HB/FD package with I.I., the FLEXAVISION first series, launched.
- in 2010 FLEXAVISION F3 package with portable FPD launched.
- in 2016 FLEXAVISION DR, I.I.-based system combining with wireless FPD / DR, launched.
- in 2017 Achieved 3,000 orders worldwide
FLEXAVISION eXceed edition for HB/FD package launched.
Shimadzu receives “2017 Global General Radiography Product Line Strategy Leadership Award” from Frost & Sullivan.
- in 2022 FLEXAVISION F4 package launched, which has a 17"×17" FPD capable of fluoroscopy & wireless radiography. Combining a bucky stand and ceiling-mounted X-ray tube maximizes the room productivity. This hybrid DR system offers the flexibility to configure an examination room tailored to your needs.
FLEXAVISION SF/HB/FD package was also reborn with new coloring.
- in 2022 FLEXAVISION series exceeded 5,000 units worldwide.

FLEXAVISION series continues to move you forward !

Our latest model **FLEXAVISION F4** package

FLEXAVISION F4 has a lighter, detachable, wireless 17x17-inch FPD not just for Fluoroscopy but for General Radiography. This unique detector transforms the Digital RF unit into a 2-in-1 system with ease and minimizes your investment using the single portable FPD.
